

Risk Indicator

1	2	3	4	5	6	7
	The risk indicator assumes you keep the product for 1 year. The actual risk can vary significantly if you cash in at an early stage and you may get back less.					

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 1 out of 7, which is the lowest risk class. This classification rates the potential losses from future performance at a very low level, and poor market conditions could affect the value of your investment. This classification is not guaranteed and may change over time and may not be a reliable indication of the future risk profile of the Fund. The lowest category does not mean risk free.

Be aware of currency risk. If you receive payments in a currency that is different to the product's base currency, the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Please refer to the product's Prospectus for details of other materially relevant risks that may apply to this product.

This product does not include any protection from future market performance so you could lose some or all of your investment.

If the product is not able to pay you what is owed, you could lose your entire investment.
